

a Nested labels on 1,035 compounds

Annotation ranges in $\mu\text{g}/\text{bee}$; tier widths follow compound counts

b Official evaluation splits

828 train / 207 test per split

c Audit workflow

Paired baseline; diagnostic subsets

- Endpoint contrasts**
Five representations; paired scaffold bootstrap
- Composition and controls**
Metadata; matched classes; source holdouts
- Tier-boundary localization**
Tier-pair AUROC; Tier1 exclusion
- Label provenance**
Record rules; matched-label correction tests
- Unseen identities**
Structure-only predictions; default decisions
