Primary label crossover

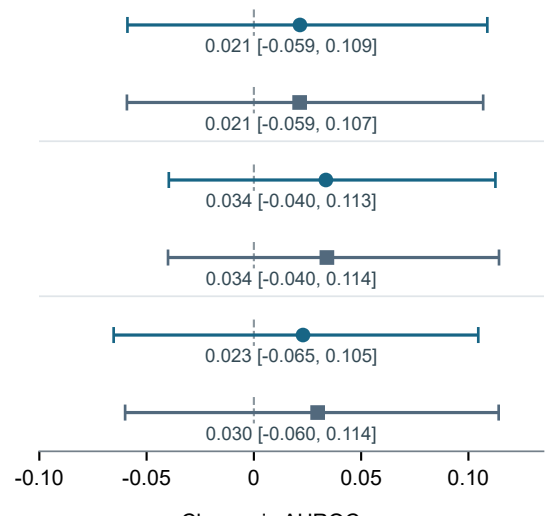

ECFP, unresolved labels kept; 828 training and 207 test compounds per split

a Four-cell AUROC gap

	O / O	O / P	P / O	P / P
Random, 11 - 100	0.130	0.170	0.114	**0.152**
Random, 1 - 100	0.199	0.239	0.183	**0.220**
MaxMin, 11 - 100	0.200	0.224	0.238	**0.234**
MaxMin, 1 - 100	0.203	0.227	0.242	**0.237**
Time, 11 - 100	0.063	0.073	0.104	**0.086**
Time, 1 - 100	0.101	0.111	0.149	**0.131**

Training / evaluation labels

b Paired change: P/P - O/O

O: distributed labels. P: provisional source-derived labels. Gaps compare severe versus 100 µg/bee endpoints.

Panel a: point estimates. Panel b: 95% paired scaffold-cluster intervals (2,000 draws), conditional on fitted models.

Positive change means a wider gap. Every interval for the paired change includes zero.
