

a

Nested endpoints are cut from one fixed compound set

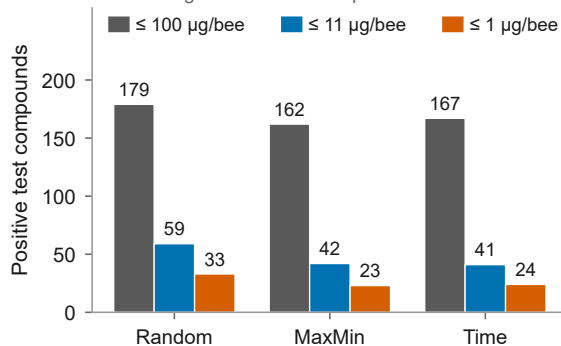

1,035 ApisTox compounds ordered by regulatory severity tier

b

Official evaluation splits

828 training and 207 test compounds each

c

Audit workflow

same compounds, splits and learners throughout

- Endpoint contrasts**
five representations; paired scaffold bootstrap
- Composition and controls**
metadata models; matched classes; source holdouts
- Tier-boundary localization**
tier-pair AUROC; Tier1 exclusion
- Label provenance**
regulatory concordance; qualifier-aware relabelling
- Unseen identities**
structure-only predictions; default decisions
